SUMMARY

Computer Science and Business Systems graduate with hands-on project experience in business operations analysis, performance reporting, SQL-based data analysis, and project portfolio tracking. Familiar with analyzing operational data, developing dashboards, monitoring project performance, and presenting business insights using SQL, Python, Excel, and Power BI. Interested in business operations, business analysis, project coordination, and process improvement roles.

EDUCATION

Dr. Ambedkar Institute of Technology, Bengaluru 2022 – 2026
B.E. in Computer Science and Business Systems **CGPA: 8.42/10**

SKILLS

Business & Operations: Business Operations, Process Analysis, Requirement Understanding, Problem Solving, Project Coordination, Performance Tracking, Documentation, Cross-functional Collaboration
Data Analysis & Reporting: SQL, Python, Excel, Power BI, DAX, Data Cleaning, Data Interpretation, KPI Reporting, Dashboard Development
Tools & Technologies: SQL Server, SQLite, MySQL, Git, GitHub, VS Code, Postman

EXPERIENCE

TAP Academy – Software Development Intern Jan 2026 – Aug 2026

- Participated in project-based technical training in an industry-oriented learning environment.
- Worked with application workflows, debugging, technical problem-solving, and understanding system functionality.
- Developed practical understanding of software systems, databases, and structured troubleshooting approaches.
- Gained exposure to AI-agentic coding concepts and modern software development practices.

Web Stack Academy – MERN Stack Developer Intern Jul 2024 – Sep 2024

- Worked with application data, REST APIs, databases, and frontend-backend workflows during web application development.
- Investigated and resolved application-level issues during development and testing.
- Worked with authentication, database operations, and application functionality.
- Used Git and GitHub for version control and development workflow management.

PROJECTS

Business Operations Analysis GitHub

- Analyzed retail operational data containing 5,000 orders and 9,981 order-item records using SQL and Python.
- Developed a Power BI dashboard to monitor business performance through KPIs, category analysis, and interactive filters.
- Created SQL analysis scripts and validated data to support accurate reporting and business insights.

Project Portfolio Management Tracker GitHub

- Developed a project portfolio analysis solution using data covering 100 projects, 500 milestones, and 200 risks.
- Created SQL analyses and a four-page Power BI dashboard covering portfolio overview, risk analysis, milestone delivery, and financial performance.
- Presented project progress, delivery status, risks, and financial indicators to support portfolio monitoring.

ACHIEVEMENTS

- Participated in Hackverse'25, showcasing innovative application ideas and presenting a project at the national level.
